

Drainage-Tone

What?

Drainage-Tone is a homeopathic drainage remedy designed to assist the body in opening blockages within the drainage pathways so toxins can be excreted.

Why?

It is essential that the drainage pathways, which the body uses to eliminate toxins, be prepared and supported in order for the body to successfully detoxify. So, what are the body's drainage pathways? The lymphatic system, spleen and thymus all work to remove toxins from the body. All three of them play a key role in immune function. A strong immune system is especially important when the body is detoxifying. Two ingredients in **Drainage-Tone** that you have probably heard of, *Capsicum annuum* (*Cayenne Pepper*) and *Echinacea angustifolia* (*Coneflower*) have been included in this remedy for their immune boosting properties. Additional homeopathic ingredients include Germanium, Calcium iodide and *Thuja occidentalis* (*Tree of Life*). Germanium is a powerful antioxidant and brings oxygen to the blood; Calcium iodide provides support for the lymph nodes which collect and destroy harmful toxic materials; and *Thuja occidentalis* is effective in eliminating the most varied range of deep-acting toxins.

Drainage-Tone provides gentle yet effective drainage while supporting the immune system. It's a great remedy for supporting children, the elderly and everyone in between when the body is going through a healing process.

How?

30 drops orally twice daily AM/PM, or as directed.

Tips:

The spleen and thymus are part of the lymphatic system which relies on movement to function properly. Do your body a favor and exercise while taking **Drainage-Tone**. Studies have shown that power walking and rebounding on a mini-trampoline are particularly helpful for a congested lymph system.
