

CoQ10 Liposome Tincture

What?

Energetix' **CoQ10 Liposome Tincture** contains a nonsynthetic form of the nutrient Coenzyme Q10. This nutrient has been widely researched and documented for its powerful antioxidant activity and positive effects for cardiovascular health, fatigue, anti-aging and a variety of other conditions.

Why?

Antioxidants – the health rage of the 21st century! Blueberries have become one of the most sought-after fruits, dark chocolate is now considered “healthy,” green tea is available in countless varieties to suit any palate, and skin care products boast the anti-aging powers of their grape seed/vitamin C enhanced moisturizer creams. It is clear that antioxidants have proven their value to this generation of health-conscious consumers.

One of the most widely-used nutrients/antioxidants out there is CoQ10. Also known as Coenzyme Q10, Ubiquinone or Vitamin Q, this vitamin-like, fat-soluble nutrient is naturally produced within our bodies and is primarily responsible for producing energy within our cells and acting as a protective antioxidant. Research has shown that our ability to produce CoQ10 diminishes with age; therefore many practitioners recommend supplementing CoQ10 in order to keep the cells young and healthy.

It is important to note that all CoQ10 supplements are not created equal. Energetix' CoQ10 Liposome Tincture formula is made with Ubidecarenone, which is made from a natural and chemical-free fermentation process, and exists in a liposome base. A liposome base is essentially a fat-based carrier that allows maximum absorption of nutrients into the bloodstream. This product also contains a small amount of Vitamin E which enhances the absorption and delivery of this fat-soluble nutrient.

CoQ10 is currently being studied in this country, and abroad, for its effects on immunity, heart disease, high blood pressure, Alzheimer's, exercise performance, gum disease, kidney failure, migraine, muscular dystrophy, fatigue, Parkinson's disease, diabetes, breast cancer, HIV/AIDS and anti-aging.

How?

30 drops orally twice daily, or as directed by your healthcare professional.

Key Ingredients:

CoQ10 (Ubidecarenone – Fermentation) 30 mg, Vitamin E (Tocophersolan) 16 IU
