

InflammaForce

What?

InflammaForce is a dietary supplement composed of ingredients shown to support the body naturally in the resolution of pain and inflammation.

Why?

The three key ingredients in this product have been used clinically for pain, inflammation, arthritic conditions and ulcerative colitis. Serrapeptase and Pancreatin are powerful, naturally-occurring enzymes known for their anti-inflammatory effects. Recent findings also suggest that Serrapeptase can offer additional support for resolving scar tissue. The ingredient Boswellin comes from beneath the bark of the Boswellia tree and has been used in Ayurvedic (Indian) medicine for hundreds of years for its anti-inflammatory properties. Recently, studies have confirmed that the active components in Boswellin, known as Boswellic acids, do have a beneficial effect on inflammatory disorders including ulcerative colitis and Crohn's disease.

How?

Take 2 capsules, three times daily or as directed by your healthcare professional.

Tips:

For best results, take **InflammaForce** between meals.

For additional deep muscle relief, mix 1-2 capsules of **InflammaForce** with 1-2 tablespoons of **BioCatalin** and apply topically to the affected area.

Key Ingredients:

Serrapeptase, Boswellin, Pancreatin 8X
