

# AminoGest

## What?

**AminoGest** is a dietary supplement that contains a unique, concentrated form of amino acids from clean, lean, deep-ocean Whitefish Protein to assist with gut renewal and repair.

## Why?

What makes this form of protein unique? First of all, it is important to understand that the body has a limited ability to utilize protein if the digestive system is compromised. Protein plays an important role in repairing weak or damaged tissue throughout the body including the digestive system and the gut. The concentrated Whitefish Protein in **AminoGest** goes through a special fermentation process, similar to fermenting milk to make yogurt, designed to break-down the proteins into a more easily digestible form, therefore making it immediately available to assist in repairing the gut or other damaged tissue. A healthy gut/digestive system benefits the entire body from head to toe!

## How?

3 - 6 capsules twice daily, or as directed.

## Tips:

Rosemary and Lemon extract have been included to assist with eliminating any "ocean" odor, but to further assist in neutralizing the odor you can store the bottle in the freezer.

### Key Ingredients:

Per capsule: Fish Protein 500 mg
