

GALT-immune

What?

GALT-immune is a power-packed, one-of-a-kind nutritional supplement designed to assist the body in building and maintaining a strong and healthy digestive tract immune system.

Why?

It's becoming mainstream knowledge that 70% of our immune system resides in our digestive tract; more specifically our intestines or "gut." The immune system acts as the body's armor against viruses, bacteria, chemicals, pollution, stress and other unwanted foreign invaders – all the more reason to give it the tools and nourishment that it needs to stay strong and resilient. Understanding the symbiotic relationship between the digestive system and the immune system is crucial, as millions of people suffer from digestive stress in the form of indigestion, gastric reflux, constipation, irritable bowel syndrome, etc., which can translate to decreased immunity.

So, the "immune" part of the equation makes sense, but what on Earth, is GALT? GALT stands for **Gut Associated Lymphoid Tissue** – so GALT is simply the immune system within the digestive tract.

GALT-immune contains key food-based nutrients in the form of amino acids (concentrated protein) to help heal and seal the gut; Colostrum, rich in healing proteins; vitamins, minerals and lipids, has been used to stimulate the immune system and may have antimicrobial actions. Finally Beta Glucan, a powerful component of oat soluble fiber, has been widely researched and documented for its positive effects on immune health. The combination of these key ingredients provides the body with specific and superior nutrition to assist in protecting and maintaining an iron-clad immune system!

How?

Take 3 - 6 capsules twice daily, or as directed by your healthcare professional.

Tips:

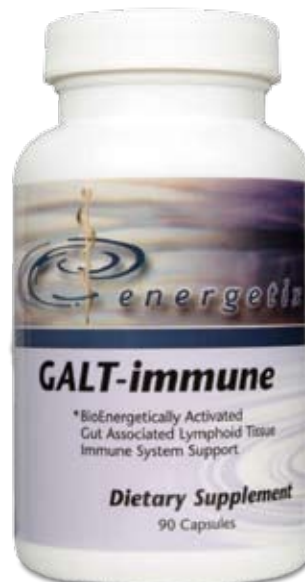

GALT-immune can be taken at the first sign of a cold or flu to assist the body's defenses.

The concentrated protein in **GALT-immune** comes from clean and lean deep-ocean Whitefish. This is an excellent source of easily digestible protein; however, it also gives the supplement a natural "ocean" scent. Rosemary and Lemon extract have been added to assist with this, but if you wish to reduce the scent further, simply store the bottle in your freezer.

Key Ingredients:

Per 3 capsules: Colostrum (Bovine) 900 mg,
Beta Glucan 300 mg, Fish Protein 300 mg
